Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended): A method for facilitating the distribution of travel-related information, comprising:

communicating with a customer over a computer network having a destination expert server, wherein the destination expert server includes an answer database and wherein communicating with the customer includes receiving, by the destination expert server, contact information from the customer;

identifying a plurality of experts, wherein the plurality of experts are in selective communication with the destination expert server;

receiving, from the customer, a request relating to a destination city to which the customer desires to travel, wherein the customer's request is received by the destination expert server;

facilitating a selection of a destination expert from the plurality of experts, wherein the destination expert has particular knowledge about the destination city;

forwarding, by the destination expert server, the customer's request and the customer's contact information to the destination expert, such that the destination expert can communicate with the customer to provide a response to the customer request; and

automatically retrieving from the answer database, without intervention by the destination expert, an answer to the customer request, such that the destination expert response includes the retrieved answer; and

enabling an interactive session between the destination expert and the customer to facilitate the destination expert interactively processing travel reservation requests from the customer.

2. (Previously Presented) The method of claim 1, wherein facilitating selection of a destination expert comprises selecting a destination expert from among the plurality of experts, wherein the destination expert is located in the destination city.

3. (Original) The method of claim 2, wherein communicating with the customer over the computer network includes receiving a credit card number from the customer.

Serial No.: 09/662,463

4. (Original) The method of claim 2, wherein the destination expert response includes an offer to book reservations relating to the customer request.

5. (Original) The method of claim 1, further comprising receiving the destination expert response from the destination expert and forwarding the destination expert response to the customer.

6. (Original) The method of claim 1, further comprising facilitating a transaction with the customer, wherein the transaction relates to the customer request.

7. (Original) The method of claim 1, further comprising monitoring communications of the destination expert server.

8. (Currently amended) A system for accepting and responding to a customer request for travel information relating to a destination city, comprising:

a destination expert server, wherein the destination expert server includes an answer database, said destination expert server configured to receive a request from a customer for information relating to the destination city, and

a plurality of experts in selective communication with the destination expert server, wherein the destination expert server forwards the customer request to a selected destination expert from among the plurality of experts, and wherein the destination expert has particular knowledge about the destination city, such that the destination expert can communicate with the customer to provide a response to the customer request, wherein the destination expert server automatically retrieves from the answer database, without intervention by the destination expert, an answer to the customer request, such that the destination expert response includes the retrieved answer; and

wherein the destination expert server enables an interactive session between the destination expert and the customer to facilitate the destination expert interactively processing travel reservation requests from the customer.

9. (Original) The system of claim 8, wherein the customer provides the destination expert server with customer contact information, and wherein the customer contact information is forwarded by the destination expert server to the destination expert.

10. (Original) The system of claim 8, wherein the destination expert is located in the destination city.

Serial No.: 09/662,463

11. (Original) The system of claim 8, wherein the destination expert server is accessible to the customer via the internet.

12. (Original) The system of claim 10, wherein the plurality of experts are in selective communication with the destination expert server via electronic mail.

13. (Currently amended) A computer-readable storage medium encoded with processing instructions for implementing a method for facilitating the distribution of travel-related information, said processing instructions directing a computer to perform the steps of:

communicating with a customer over a computer network having a destination expert server, wherein the destination expert server includes an answer database and wherein communicating with the customer includes receiving, by the destination expert server, contact information from the customer;

identifying a plurality of experts, wherein the plurality of experts are in selective communication with the destination expert server;

receiving, from the customer, a request relating to a destination city to which the customer is interested in traveling, wherein the customer's request is received by the destination expert server;

facilitating selection of a destination expert from the plurality of experts, wherein the destination expert has particular knowledge about the destination city;

forwarding, by the destination expert server, the customer's request and the customer's contact information to the destination expert, such that the destination expert can communicate to the customer a response to the customer request; and

automatically retrieving from the answer database, without intervention by the destination expert, an answer to the customer's request, such that the destination expert response includes the retrieved answer; and

enabling an interactive session between the destination expert and the customer to facilitate the destination expert interactively processing travel reservation requests from the customer.

14. (Previously Presented) The computer-readable storage medium of claim 13, wherein the processing instructions for directing a computer to perform the step of facilitating selection of a destination expert comprises processing instructions for directing the computer to

Serial No.: 09/662,463

perform the step of selecting a destination expert from among the plurality of experts, and wherein the destination expert is located in the destination city.

15. (Original) The computer-readable storage medium of claim 14, wherein the processing instructions for directing a computer to perform the step of communicating with the customer comprise processing instructions for directing a computer to perform the step of communicating with the customer over the computer network, wherein communicating with the customer over the computer network includes receiving a credit card number from the customer.

16. (Original) The computer-readable storage medium of claim 14, wherein the processing instructions for directing a computer to perform the step of forwarding the customer's request and the customer's contact information to the destination expert comprises processing instructions for directing a computer to perform the step of forwarding the customer's request and the customer's contact information to the destination expert, such that the destination expert can communicate to the customer a response to the customer request, and wherein the destination expert response includes an offer to book reservations relating to the customer request.

17. (Original) The computer-readable storage medium of claim 14, wherein the processing instructions further direct the computer to perform the step of receiving the destination expert response from the destination expert and forwarding the destination expert response to the customer.

18. (Original) The computer-readable storage medium of claim 14, wherein the processing instructions further direct the computer to perform the step of facilitating a transaction with the customer, wherein the transaction relates to the customer request.

19. (Original) The computer-readable storage medium of claim 14, wherein the processing instructions further direct the computer to perform the step of monitoring communications of the destination expert server.

20. (Currently amended) A device for enabling customers to access experts located in cities to which the customers may wish to travel, where the experts can answer customer questions and book travel arrangements for the customers, comprising:

a processor;

a storage device in communication with the processor via a system bus, wherein the storage device, and

Serial No.: 09/662,463

a memory connected to the processor, the memory including an operating system for storing a program to control the operation of said processor, and a destination expert control module,

wherein the processor is operative with the destination expert control module to: communicate with a customer over a computer network having a destination expert server, wherein the destination expert server includes an answer database and

wherein communicating with the customer includes receiving, by the destination expert server, contact information from the customer;

identify a plurality of experts, wherein the plurality of experts are in selective communication with the destination expert server;

receive, from the customer, a request relating to a destination city to which the customer is interested in traveling, wherein the customer's request is received by the destination expert server;

select a destination expert from among the plurality of experts, wherein the destination expert is located in the destination city, and

forward, by the destination expert server, the customer's request and the customer's contact information to the destination expert, such that the destination expert can communicate with the customer to provide a response to the customer request, wherein the destination expert control module automatically retrieves from the answer database, without intervention by the destination expert, an answer to the customer's request, such that the destination expert response includes the retrieved answer; and

enable an interactive session between the destination expert and the customer to facilitate the destination expert interactively processing travel reservation requests from the customer.

21. (Original) The device of claim 20, wherein the identification of a plurality of experts comprises confirming that the destination expert is familiar with the destination city.

22. (Original) The device of claim 20, wherein communicating with the customer over the computer network includes receiving a credit card number from the customer.

23. (Original) The device of claim 20, wherein the destination expert response includes an offer to book reservations relating to the customer request.

Serial No.: 09/662,463

24. (Original) The device of claim 20, wherein the processor is further operative with the destination expert control module to receiving the destination expert response from the destination expert and forward the destination expert response to the customer.

25. (Original) The method of claim 20, wherein the processor is further operative with the destination expert control module to facilitate a transaction with the customer, wherein the transaction relates to the customer request.

26. (Original) The method of claim 20, wherein the processor is further operative with the destination expert control module to monitor communications of the destination expert server.

27. (Canceled)

28. (Previously Presented) The method of claim 1, further including the step of transmitting the automatically retrieved answer to the customer.

29. (Canceled)

30. (Previously Presented) The computer-readable storage medium of claim 13, wherein the processing instructions for directing a computer to perform further include the step of transmitting the automatically retrieved answer to the customer.

31. (Canceled)

32. (Previously Presented) The device of claim 20, wherein the processor is operative with the destination expert control module to transmit the automatically retrieved answer to the customer.
